DRM-T100 Linear DRM Transmitting Power Amplifier Solid State

Frequency Range:	2 –28 MHz; Medium wave version on request
Output Power :	1 kW Peak according 100W DRM true rms
Gain:	50 dB fixed; integrated output harmonic filter 28 MHz
Linearity:	Serves ITU limit curve
Power Supply:	Integrated; 115, 230 or 240V AC, ca. 300W
Dimensions:	19" 3 Highness units
Input/ Output:	50 Ohms N female
Alarm Output:	Customer defined

Protection circuits against overload and mismatch. Also usable as driver stage for linear final stage.

Issued: January 2007. Specifications subject to change without notice.
